

# Join the virtual National Solar Tour

Shine a light on solar  
at your school

SEPTEMBER 28 – OCTOBER 4, 2020

## Host a Virtual Solar Open House

Join the National Solar Tour and showcase your clean energy leadership in your community and beyond.

We invite all solar schools to sign up now to host a *virtual* solar open house on the interactive National Solar Tour website. All you have to do is send us a video or photo tour and share some details about your school's solar project and other green building features.

All schools that register as a host of a solar open house will be entered to **win a solar educational kit** (value of up to \$375) that includes standards-based lesson plans and interactive classroom materials for 30 students. One elementary school, middle school, and high school winner will be selected.

## Attend Virtual Solar Events

Participate in the National Solar Tour's live virtual solar experience the week of September 28 – October 4.

In addition to checking out virtual open houses anywhere in the country, you can participate in live virtual events all week. During these events, attendees will have a chance to connect with solar owners around the nation, ask questions, and learn about the benefits of solar.

Join us on **Thursday, October 1st** for a special **Solar for Schools Day** of virtual events to kick off National Energy Awareness Month. Generation180 will share resources, lesson plans, and more with participating schools throughout the month of October.

Visit [Generation180.org/national-solar-tour](https://www.generation180.org/national-solar-tour) to learn more and to register as a host or attendee.

## NATIONAL SOLAR TOUR

in partnership with

### About the National Solar Tour

Generation180 is partnering with Solar United Neighbors and American Solar Energy Society for the 25th anniversary of the National Solar Tour. Last year, over 1,000 schools, homes, businesses, municipalities, places of worship, and community solar gardens opened their doors to the community to celebrate and learn about solar. Over 10,000 tour attendees engaged with hosts about how to go solar and learn about various clean energy technologies, including solar power, energy efficiency, electric vehicles. ### About Generation180

Generation180 is a national nonprofit organization working to inspire and equip people to take action on clean energy. Our Solar For All Schools campaign provides resources and support for K-12 public and private schools to power a brighter future through solar energy.
