

25TH NATIONAL SOLAR TOUR

in partnership with
 Generation180

Join Us September 28th-October 4th for the largest grassroots renewable energy event in the nation!

The National Solar Tour draws thousands of homeowners to events around the country that take place at homes, community centers, schools, and businesses. During this week, solar owners and supports will have a chance to connect, ask and answer questions, and participate in a nationwide virtual solar experience.

Attendees will be able to view video tours of solar installations, ride along in an Electric Vehicle during a virtual test drive, and learn about solar during a full week of virtual programming—all from the comfort of their own home!

More than 90% of Americans agree that solar is something we should all get behind.

Join the movement!
