

Sign-Up to Host a Local Tour or Tour Site on the National Solar Tour!

October 6-8, 2023

In-Person & Online

Join hundreds of your fellow solar enthusiasts from across the country in the largest national solar event, coordinated by the leading solar energy non-profit organization, the American Solar Energy Society.

Welcome interested members of your community to see your solar system up close and hear about your experience and reasoning for going solar either in-person and/or virtually. Connect with folks who are interested in going solar, show off your solar system, answer questions, share stories, and celebrate the power of solar energy!

Hosting a Tour Site or Local Tour is easy! Any solar or sustainable home, business, non-profit organization, religious institution, or municipal building is invited to participate by hosting a virtual, in-person, or hybrid event on this year's Tour!
