

Add Your Tour to the National Solar Tour Map

A quick-start guide for tour hosts. Get your Tour Site or Local Tour live on the map in six easy steps.

1 Go to the Map

Visit nationalsolartour.org and click **Map** in the top navigation bar.

2 Sign Up or Log In

Click **Sign Up / Log In** in the top right hand corner and add your email. If you've hosted an even the last couple of years, your tour information is still in our system, you can update the same tour page accordingly by using the same email you used last time as your login.

3 Add your Tour Site or Local Tour

From your **My Sites (Single Site)** page, click **Add a New Site** or **My Tour (Multiple Tours)**, then click **Create New Tour**. Enter your site name, type, city/state/zip, and a description. Please note that adding a street address is optional for virtual tours and never shown publicly.

4 Add a Technology

Required for your site to appear on the map. Add at least one technology (solar, EV, battery, etc.) with a size, short description, and at least one photo.

5 Preview it

Click **View** to see your page exactly as visitors will.

6 Create an In-Person Tour

Add a street address, then click **Add New In-Person Event** to set a date and time.

Visitors must RSVP to see your address. It's never public otherwise..

That's it! Your Tour is live on the map.

Edit your details anytime from your My Sites or My Tours page.
